- Information technology services
- Enterprise design, integration and consolidation
- Education/training
- Program/project management
- Systems operation and maintenance
- Network system operations and maintenance
- Cybersecurity services

The Information Technology Enterprise Solutions-2 Services (ITES-2S) program is a performance-based, indefinite delivery/indefinite quantity (ID/IQ) contract that includes a full range of IT services and solutions needed to satisfy and support the U.S. Army's Enterprise Network Vision worldwide.

The U.S. Army is undergoing the most massive transformation of its 240+-year history. At its heart is the Enterprise Network Vision to shape the U.S. Army network of the future that is based on retaining the best of its current capabilities and developing improved interoperable functionality by procuring new technology solutions and services. Realizing this vision requires collaboration between the Army and industry as well as a comprehensive and balanced transformation approach. ITES- 2S is the key contract by which the Army is able to quickly acquire a modern, mobile network and related solutions to undergo this transformation.

How to use ITES-2S

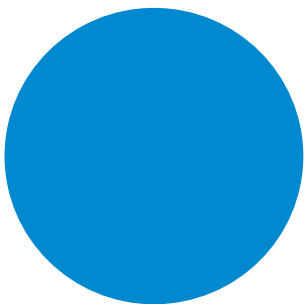

The U.S. Army, Department of Defense (DoD), and other federal agencies can use the ITES-2S contract to procure IT services and support. Working in partnership with the prime contractors, the Army Computer

Hardware, Enterprise Software and Solutions (CHES) organization manages the contract in coordination with the Army Contracting Command-Rock Island (ACC-RI) center. Through ITES-2S, users have a flexible means of meeting IT service needs quickly, efficiently and cost-effectively. Any contracting office can place orders, and there is no fee to place orders against the ITES-2S contract. For questions regarding the guidelines and procedures for placing orders, contact CHES. For contract questions, contact the Procuring Contracting Office (PCO), ACC-RI. Both can be reached at www.ches.army.mil.

Perspecta: your trusted ITES-2S partner

Perspecta is a proven ITES-2S partner. We have decades of successful experience supporting large, complex federal government programs, managing large contract vehicles, including ITES-2S and delivering IT service to the DoD and federal government organizations at all levels.

Our best practices are based on industry standards for quality, including PMI PMBOK®, SEI CMMI®, ISO and ITIL, and we have a rich repository of proven methodologies for consistently delivering systems and services.

Why Perspecta?

- **IT leadership:** Perspecta is a leading, independent, end-to-end IT services company, helping customers in the public sector. Our deep experience in digital solutions — including cloud, applications, analytics, workplace and mobility and security — gives us a clear and confident vision to help Army organizations navigate the future
- **Deep and broad Army mission understanding and experience:** For more than 30 years, Perspecta technologies, services, and business solutions have been supporting Army infrastructure, networks, systems, and data that serve every stage of the Army lifecycle — from acquiring, training, distributing, deploying, sustaining, developing and retiring. With Perspecta, there is no learning curve, because we are already behind the scenes every day, around the world, supporting the mission
- **Demonstrated record of Army ITES-2S success:** Perspecta has a highly experienced, streamlined ITES- 2S program management office in place that is dedicated specifically to

managing all task orders. Our team has delivered 49 ITES-2S task orders to date and consistently achieved exceptional ratings via Contractor Performance Assessment Reporting System (CPARS), which is predictive of our performance on future task orders

- Our technology independence makes us a trusted advisor able to objectively recommend and deliver the right solutions at the best price to address the Army's technology challenges and achieve desired business and mission outcomes
- Our extensive global partner network helps us drive collaboration and bring thought leadership to the Army. We have industry-leading partner network relationships, including: Amazon Web Services, AT&T, Dell EMC, HPE, HP, IBM, Micro Focus, Microsoft, Oracle, PwC, SAP and ServiceNow that we can use to support Army requirements
