Cybersecurity

Security isn't just firewalls and encryption, it's essential to your mission's success

Key offerings include

- Cybersecurity engineering, integration and advisory services
- Cybersecurity training, planning and exercises
- Computer network exploitation
- Security Operations Center (SOC) services
- Platform, network and critical infrastructure protection
- Advanced cybersecurity tools and solutions
- Identity, credentialing and access management (ICAM)
- Threat prevention, detection, analytics and response
- Security policy, risk management and compliance

At Perspecta, we have the know-how to meet your cyber needs, regardless of how complex the solution. We blend extensive experience collaborating with the U.S. government with proven applied research and a Silicon Valley mindset to deliver a unique cyber advantage.

Our offerings predict attacks, proactively respond to threats, ensure compliance and protect data, applications, infrastructure and endpoints.

Cybersecurity advisory and engineering

Perspecta cybersecurity advisors and engineers have the knowledge and experience to evaluate a client's IT environment and implement cybersecurity solutions that are efficient and effective while minimizing operational risk. Our team of dedicated professionals provide customers with advisory services for security risk management, compliance and security program maturity assessments.

Additional offerings include comprehensive application threat assessments (CATA) and as an accredited Third Party Assessment Organization (3PAO) status under FedRAMP, the performance of initial and periodic assessments of security and privacy controls deployed in cloud information systems.

Cybersecurity operations

We are proud to lead the industry in critical infrastructure protection and industrial control systems security. We actively manage risk using proven security engineering strategies, innovative cyber technologies, and comprehensive vulnerability assessment and penetration testing services to expose and remediate vulnerabilities, harden network defenses and optimize defensive measures against future attacks. Our subject matter experts employ a suite of automated tools and solutions to protect our customers' environments as well as their data – both at rest and in transit. This includes working with customers to perform cyber experimentation,

automated configuration synthesis, repair, visualization and verification and moving-target defense. The customer benefits by gaining a keen understanding of tactical and strategic remediation strategies to protect their critical assets.

Cybersecurity solutions

Together with our transformational applied research organization, Perspecta Labs, we deliver a full range of cybersecurity services and solutions that protect your enterprise. Our continuous vulnerability monitoring and analytic offerings (CDM, CDSA, CSAM) are all built on a common, open architecture that is vendor agnostic. This enables us to bring our clients a solution that leverages their existing investment in security tools, fills any gaps, and integrates into their existing ticketing systems. Our subject matter experts protect our customers' networks, platforms and critical infrastructures against cyber intrusions and malicious attacks. We employ continuous monitoring strategies and provide our customers with cyber defense situational awareness through analysis and remediation strategies. Our security-driven analytics provide our customers with insider risk solutions to meet current and emerging government mandates, and protect their vital data. Customers benefit through the assurance that their environments are secured at the appropriate level relative to their risk tolerance and risk profile.

About Perspecta

At Perspecta (NYSE: PRSP), we question, we seek and we solve. Perspecta brings a diverse set of capabilities to our U.S. government customers in defense, intelligence, civilian, health care and state and local markets. Our 260+ issued, licensed and pending patents are more than just pieces of paper, they tell the story of our innovation. With offerings in mission services, digital transformation and enterprise operations, our team of 14,000 engineers, analysts, investigators and architects work tirelessly to not only execute the mission, but build and support the backbone that enables it. Perspecta was formed to take on big challenges. We are an engine for growth and success and we enable our customers to build a better nation.
