Services for Microsoft Office 365®

Improve user experience and productivity while reducing data center foodprint with seamless transformation, management and support services

Demands on organizations to lower costs and increase agility all while staying up with the latest productivity application versions are driving the move to Office 365. The move to Office 365 further allows an enterprise to focus on their core mission and adopt an efficient common productivity suite.

While the move to Office 365 can seem straightforward, in reality, it's not. For example, Microsoft is free to change network configurations when they desire, which can wreak havoc. SharePoint Online transformation issues can cause many unforeseen setbacks for an organization. Many organizations start the transformation and hit major issues without a clean resolution to achieve their objective.

End-to-end support of O365 migrations

Perspecta's services for O365 provide advisory, planning, design, migration, delivery and daily operational support of O365 workloads. In addition, our financial and governance services help reduce uncontrolled consumption.

Our managed services scale up and down to continually meet your changing business needs, ensuring that your IT costs and services will always align to business demand.

We help you realize the full financial and operational benefits of O365 through end-to-end services. These include advisory services to identify the best end state for your mission whether on-premise, hybrid or public cloud along with a transformation plan. Additionally, our migration services for O365 reduce transformation risk and include hybrid or full deployment for a seamless end-user experience during migrations. To make the switch even easier, we offer component pilot migrations to establish a velocity baseline.

Perspecta is uniquely positioned to support O365. Our seasoned expert advisors, specialized tools and services for risk mitigation, security and regulatory compliance can help you achieve savings while reducing enterprise risk.

Benefits

- Remove the hidden and unforeseen complexities migrating to and managing O365
- Simplify support with a single point of contact for incident, change and problem management
- Drive a seamless end-user experience during migrations

Perspecta and Microsoft OS65

- 1,600 Microsoft certifications, 2,000 Lean Six Sigma certifications and more than 325 trained and certified LSS professionals
- Microsoft Azure preferred partner, Microsoft Gold Certified Partner, cloud solution provider (CSP) and managed services provider (MSP)
- Global Microsoft licensing solution provider
- Microsoft O365 and Enterprise Mobility and Security (EMS) partner

How it works

No matter where you are on your O365 lifecycle, Perspecta can address your needs.

Advisory services

Our advisory services provide a broad to focused approach depending on your drivers, and you can source from any or multiple stages. The stages begin with aligning O365 to your mission, business and vision. The next stage provides discovery and ROI justification followed by the readiness assessment stage. The last stage plans the deployment and transformation again as specific to the application such as Exchange, Sharepoint, OneDrive, etc. or multiple applications as necessary.

Transformation services

Our transformation services provide a six-phased approach starting with initiating transformation project governance, discover and assess current environment, design and develop a step-by-step plan. Next, we implement the O365 transformation plan, perform pre-production pilots and finish with migrating users to O365.

Managed services

Perspecta's managed services consist of change management, crisis management, incident management, security and auditing, reporting and problem management. We manage rapid capability releases with regular Microsoft roadmap reviews, testing, feature education, and customer communication and preparation.

The Perspecta difference

Perspecta's proven transformation methodology provides guidance for main workloads and the supporting ecosystem, including authentication, network, devices and applications. You can leverage our vast experience to accelerate deployment.

With more than 25 years of experience managing complex environments, Perspecta offers comprehensive support—from O365 to legacy on-premise environments. We provide an integrated delivery model across cloud and on-premise workloads.

A leading Microsoft partner

Perspecta's managed services for O365 are built on our 30-year global strategic partnership with Microsoft. We support Microsoft's mission to empower every person and organization on the planet to do more and achieve more.

We help our customers unlock the value of their IT investments and take full advantage of the digital economy. Our team of 14,000, of which more than 46 percent is cleared, is ready to advise you on bringing cost transparency, governance and operational excellence to O365.
