

Unified endpoint management

Management solutions for the modern digital workplace

Benefits

- Manage any application on any device
- Prevent enterprise data loss at each layer
- Conditional access
- CAC/PIV support and multi-factor authentication
- Legacy and modern application management support
- Cloud or on-premise options

As government agencies begin or continue their digital transformation and technology modernization journeys, they are searching for ways to manage a plethora of as-a-Service, mobile and workplace applications, evergreen operating system (OS) updates and complex devices—all while simplifying governance and policy management while reducing costs. Modern applications sit outside of the traditional agency network, different devices have different release trains and legacy applications still need to be supported. Agencies are plagued by these and other challenges while still needing to ensure secure access to data and an enhanced user experience.

In an effort to simplify end-user management, agencies must first understand the complexities and nuances of their digital workplace before seeking a solution to help navigate these challenges, reduce costs and increase security.

Managing the modern workplace

Perspecta's unified endpoint management services allow you to focus on governance and policy for the user and the data, regardless of the OS or endpoint. Our solutions:

- Deliver and manage any application on any device at a lower cost than traditional methods
- Integrate access control, multi-platform, multi-OS endpoint management and application management into one service solution
- Integrate with your multi-factor authentication Common Access Card/ Personal Identity Verification solutions including derived credentials
- Support multiple device choices with IT-defined risk-addressed conditional access policies and governance, including the device compliance state

Government standards supported

- Federal Information Processing Standard (FIPS) 140-2
- National Institute of Standards and Technology (NIST) 800-53
- National Information Assurance Partnership (NIAP) Commercial Solutions for Classified (CSfC) validation
- Criminal Justice Information Services
- Defense Information Systems Agency Impact (DISA) Level 2, 3 and 5
- Federal Risk and Authorization Management Program (FedRAMP)
- Internal Revenue Service 1075
- International Traffic in Arms Regulations
- NIST 800-171

- Optimize the user experience and automate traditional on-boarding, laptop and mobile device configuration and deliver real-time application life cycle management that bonds legacy applications in the mobile and cloud age
- Provide intuitive single sign-on access to mobile, web, windows and cloud applications—including Office 365 applications

Our suite of advisory, migration and management services help define your strategy to ease migration and management by identifying gaps and efficiencies, maintaining business continuity and enhancing user experience.

Built for government

Our solution is made for government customers in mind, with features you can count on:

- **Protection policies:** We safeguard data even with unmanaged devices used by employees or partners to access agency work files
- **Application management:** Both modern and legacy
- **Self-configuration:** Options available for laptops, smart phones and tablets
- **Third-party integration:** Supporting multi-factor authentication, derived credentials, single sign on and SCCM

Our partners

We partner with two premier leaders in this space, VMware and Microsoft. Both VMware's Workspace ONE (formerly Airwatch) and Microsoft Intune are leaders in unified endpoint management and offer our customers robust feature sets. They both seamlessly integrate with SCCM and third-party identity solutions. Additionally, our vendor-agnostic philosophy allows us to leverage additional partners based on your requirements.

Why Perspecta

Perspecta manages more than 450,000 devices across the federal and state and local governments, including laptops, desktops as well as more than 72,000 mobile devices. Through our more than 25 years of experience managing workloads, we have managed devices, applications, images and users for defense and civilian government agencies as well as managing 1.12 million mailboxes across the U.S. public sector.

Perspecta has the advisory, architecture, design, transformation and management experience to ensure a successful migration. We will adjust our pace as your needs dictate, and when users need assistance, we have more than 1,000 service desk agents at the ready. Currently, our service centers receive and resolve more than 7 million contacts across all contact channels annually.

Next steps

To get started, contact Perspecta and learn how we can simplify your move to unified endpoint management. Regardless of where you are in your journey, Perspecta is here to help.
